Ln 84, Col 5 Spaces: 2 U
```

Console Log:

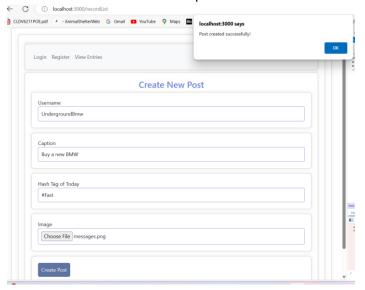

3) Get All Post

This screenshot shows all posts.

4) Create Post

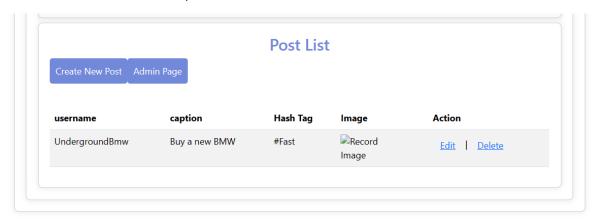

• This screenshot shows that the post was created successfully using validation.

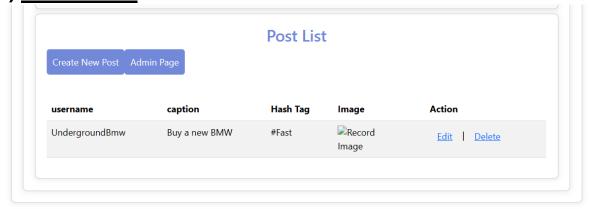

Console logs

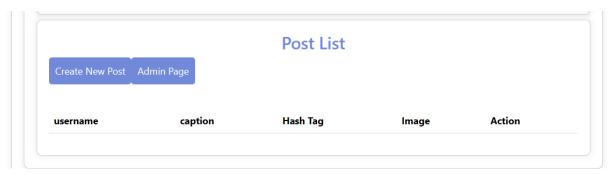

This screenshot shows post has been created

5) Delete Post

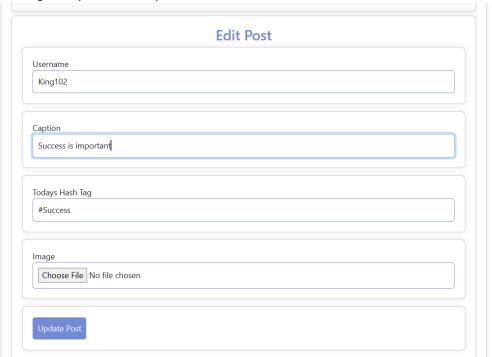

• Showing that post has been deleted.

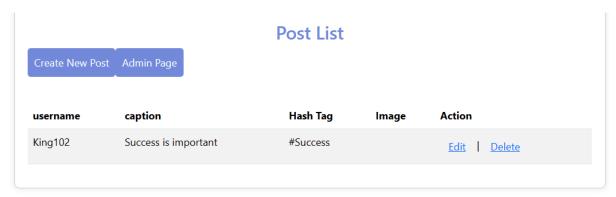

6) Edit Post

• Showing the update to the post.

• Showing the change made by the update

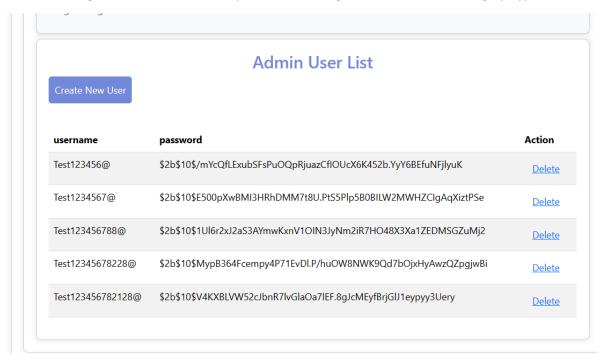

7) Admin Page

• Take Admin to the all user account

• Showing all user accounts, user password is being hashed and salted using bycrypt

8) Git Hub Link

Git hub link: https://github.com/ST10084299/ST10084299_APDS7311_POE.git

9) Client and Server Running

• Showing the server running on port 5050.

```
C:\Users\razia\Muhammad Ismail_ST10084299_APDS7311_Task 2\ST10084299_APDS7311_TASK2\Mern>cd server

C:\Users\razia\Muhammad Ismail_ST10084299_APDS7311_Task 2\ST10084299_APDS7311_TASK2\Mern\Server>node server.mjs
mongodb\srv:\/\st10084299\stance\geq\cluster0.frc\swcj\mongodb\net/
^C

C:\Users\razia\Muhammad Ismail_ST10084299_APDS7311_Task 2\ST10084299_APDS7311_TASK2\Mern\Server>node server.mjs
mongodb\srv:\/\st10084299\stance\geq\cluster0.frc\swcj\mongodb\net/
connected to db

C:\Users\razia\ST10084299_APDS7311_TASK2\Mern\Server\keys\certificate\pemCert\ and\keyC:\Users\razia\ST10084299_APDS7311_TASK2\Mern\Server\
keys\privatekey.pem
Server\ is\running\ on\ port:\ 5050

\[ \lambda 1. \text{ Spaces 2} \]
```

• Showing the client is running.

```
C:\Users\razia\Muhammad Ismail_ST10084299_APDS7311_Task 2\ST10084299_APDS7311_TASK2\Mern>cd client
Compiled successfully!

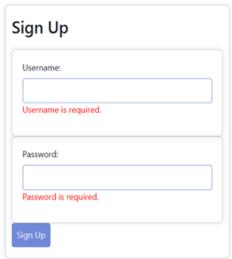

You can now view client in the browser.

Local: http://localhost:3000
On Your Network: http://192.168.9.7:3000

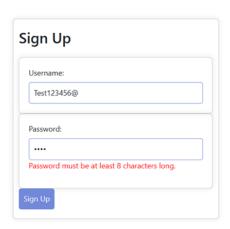

Note that the development build is not optimized.
To create a production build, use npm run build.
```

10) Validation

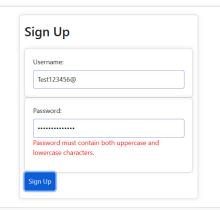

• This is a screenshot showing input validation for signing up.

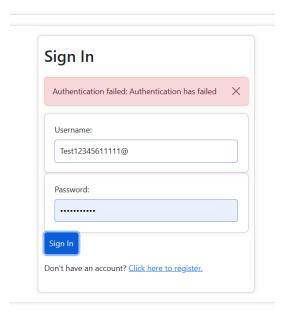

• This screenshot shows the sign-up validation of the password length.

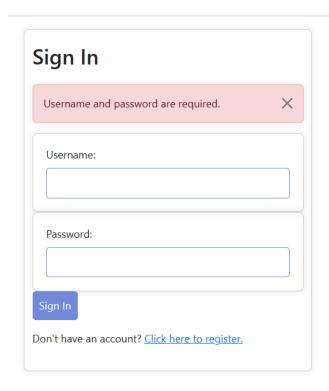

• This screenshot shows the implementation regex for the password.

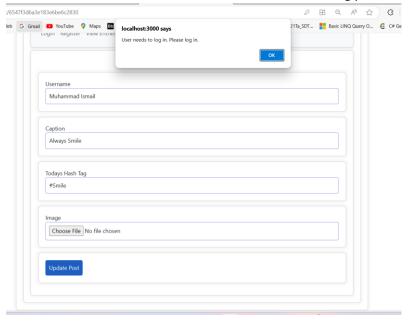

• Showing the Login Validation when user has not authenticated successfully

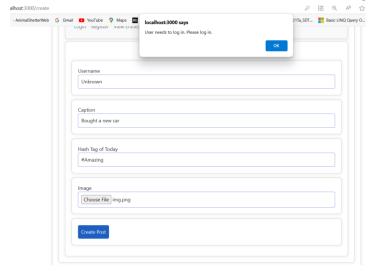

• This Screenshot shows username and password is required

This screenshot shows session token validation for editing posts.

• This screenshot shows Session Token Validation for creating Post

• This screenshot show that Username, caption , hastag and image is required

 We have implemented input Sanitization using DOMPurify to ensure users account were protected

```
const navigate = useNavigate();

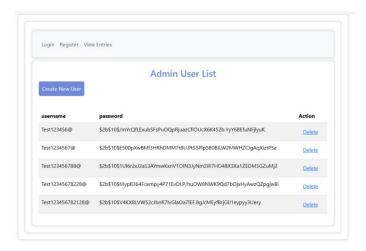

const handleSignup = async () => {
   try {
      const MIN_PASSWORD_LENGTH = 6;
      const Max_PASSWORD_LENGTH = 10;

      const sanitizedUsername = DOMPurify.sanitize(username.trim());
      const sanitizedPassword = DOMPurify.sanitize(password.trim());

   if (!sanitizedUsername) {
      setUsernameError('Username is required.');
      return;
   }
}
```

11) Password Obscurity

• This screenshot is showing the all user accounts:

12) User Login Detail

Login 1:

Username:Test123456@

Password: Test123456@

Login 2:

Username:Test1234567@

Password: Test1234567@
